Professional Summary

Results-driven Full-Stack Developer with 1+ year of professional experience building scalable, production-ready web applications and managing end-to-end deployments. Proficient in React.js, Next.js, TypeScript, and Python FastAPI, with hands-on DevOps expertise in Docker, Nginx, and AWS. Currently designing and integrating **n8n** automation workflows and **Agentic AI** pipelines to streamline business operations. MCA graduate with a strong computer science foundation and a clear growth path toward data engineering and AI-driven product development.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Material UI (MUI), Shadcn UI, Bootstrap, HTML5, CSS3

Backend: Python, FastAPI (development, maintenance & bug fixes), REST API integration, Firebase

DevOps / Server: Docker, Nginx (reverse proxy, SSL), AWS (EC2/S3), Linux Server Management, PM2, CI/CD Deployment

AI & Automation: n8n Workflow Engine, Agentic AI Integration, API Orchestration, Process Automation

Tools & Other: Git, GitHub, Postman, Windsurf, RBAC Design, Authentication Flows, State Management

Exploring (Growth Area): Data Analysis — Python (Pandas, NumPy), SQL, Power BI

Soft Skills: Problem Solving, Team Collaboration, Agile Development, Time Management, Leadership

Experience

Software Engineer, Matainja Technologies – Kolkata, WB

May 2025 – Present

- Building and maintaining enterprise frontend modules with React.js and Next.js for a government-sector performance management platform.
- Containerising services with Docker and configuring Nginx reverse-proxy servers for staging and production deployments on AWS.
- Designing and integrating **n8n** automation workflows and **Agentic AI** pipelines, reducing manual operations and improving process efficiency.
- Maintaining Python FastAPI backend — handling API updates, bug fixes, and optimising data-heavy endpoints for 10,000+ record payloads.
- Implementing complex business logic: theme management, multi-role RBAC, and frontend calculations on backend-provided datasets.
- Collaborating across frontend, backend, and infrastructure to ship production-ready features end-to-end.

Frontend Developer (Trainee), Webskitters Technology Solutions – Kolkata, WB

June 2024 – March 2025

- Refactored legacy React codebases and introduced Redux Toolkit, improving state management scalability and reducing unnecessary re-renders.
- Developed responsive, reusable UI components in React.js, Next.js, and Tailwind CSS ensuring consistent cross-device experiences.
- Collaborated with senior engineers and designers in an agile workflow, delivering user-friendly features on schedule.

Projects

PMS – Performance Management System (In Production)

Stack: React.js · Next.js · TypeScript · Tailwind CSS · FastAPI · Docker · AWS · Nginx

- Centralised performance tracking platform for multiple government departments — Education, Water, Youth, and Communication.
- Designed RBAC with Staff, Supervisor, and Officer roles, each with dedicated dashboards and granular permission layers.
- Handled Docker-based containerisation and Nginx configuration for staging and production environments on AWS.
- Integrated complex APIs for large-scale reporting; optimised frontend data-fetching for datasets exceeding 10,000 records.

LMS – Learning Management System

Stack: Next.js · TypeScript · Tailwind CSS v4 · Firebase

- Fully functional LMS with course listings, detail pages, Firebase authentication, and protected routing for secure access control.
- Optimised UI performance across all screen sizes with consistent load times and accessible layouts.

Cake Shop – E-commerce Platform

Stack: React.js · Redux Toolkit · Tailwind CSS

- Product ordering platform with cart management, user authentication, form validation, and complete order confirmation workflow.
- Used Redux Toolkit for predictable global state and seamless data flow across the checkout process.

Book Review System

Stack: React.js · Tailwind CSS · Local Storage

- Responsive review platform using browser local storage for client-side data persistence without a backend.
- Built with strong UI/UX design principles and a fully reusable component architecture.

Education

Vidyasagar University, Paschim Medinipur, WB
Master of Computer Applications (MCA)

Jun 2022 – Mar 2024

Burdwan University, Burdwan, WB
Bachelor of Computer Applications (BCA)

Jun 2019 – Mar 2022

Certifications

- **Frontend Developer (React)** – Webskitters Academy, 2024
- **Certificate of Internship Completion** – Matainja Technologies

Career Trajectory

Short-term: Deepen expertise in Docker/Kubernetes, Agentic AI orchestration, and n8n-based process automation.

Mid-term: Transition into a Full-Stack + Data Engineering hybrid role, leveraging Python for pipeline development and analytics. Actively building skills in Pandas, NumPy, SQL, and Power BI.
